PROFESSIONAL SUMMARY

MCA (Master of Computer Applications) student currently in the 3rd semester, with working knowledge of Python, HTML, CSS, and JavaScript. Hands-on academic project experience in full-stack web development (React, Node.js, MongoDB) and machine learning. Seeking internship and entry-level opportunities in software development, web development, or machine learning.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript

Web Technologies: HTML, CSS, React, Node.js, Express.js, Tailwind CSS, REST APIs, JWT Authentication

Database: MongoDB (Mongoose)

Machine Learning & Data Analysis: NumPy, Pandas, Scikit-learn, K-Means Clustering, Hidden Markov Models, Feature Engineering, Time-Series Analysis

Tools: Git, GitHub, Streamlit, Cloudinary

EDUCATION

Master of Computer Applications (MCA)
City Engineering College, VTU, Bangalore
Currently Pursuing – 3rd Semester | Expected Graduation: 2027 | CGPA: 7.9

Bachelor of Science in Computer Science and Physics
PES College of Science, Arts and Commerce, Mysore University
Graduation Year: 2024 | CGPA: 7.9 | Percentage: 79%

PROJECTS

CareerNest Job Portal – Job and Career Preparation Application
GitHub: https://github.com/shrrya19/Job-Portal-AWS

- Developed a full-stack job and career preparation portal with separate student and recruiter experiences using React, Redux Toolkit, Node.js, Express, and MongoDB.
- Implemented registration, login, and profile management with bcrypt password hashing and JWT authentication stored in HTTP-only cookies.
- Built REST APIs and interfaces for job search, applications, and saved jobs (students) and company, job posting, and applicant management (recruiters).
- Created resume tools with PDF/DOCX upload, text extraction, and ATS-style analysis, plus an interview practice module; integrated Cloudinary for file storage.

HealTalk – Mental Wellness Support Platform
GitHub: https://github.com/shrrya19/HealTalk

- Developed a web-based mental wellness support platform with separate frontend and backend components.
- Built core features including user authentication, dashboards, and mood tracking functionality.
- Implemented modules for wellness articles, support groups, and supporter availability.
- Created a feedback system to collect user input and support ongoing platform improvement.

Market Regime Detection Engine

- Built a machine learning project to detect market regimes from financial time-series data using K-Means clustering and Gaussian Hidden Markov Models (HMM).
- Engineered features such as log returns and rolling volatility to improve model accuracy.
- Preprocessed and analyzed financial data using Python, NumPy, and Pandas.
- Designed an interactive Streamlit interface to visualize and explore detected market regimes.

CERTIFICATIONS

- Artificial Intelligence (AI) for Management – NPTEL (IIT Madras), Jan–Apr 2026
